I am a multidisciplinary creative with a passion for storytelling across mediums. With a background in media production and performing arts, I combine conceptual thinking with technical skill to craft immersive and engaging content. Whether through photography, videography, game design, or creative direction, I explore how stories evolve and adapt, using different formats to enhance emotion, atmosphere, and meaning. I excel both independently and in collaborative environments, bringing adaptability and a strong creative vision to every project.

### CREATIVE PROJECTS

#### Narrative Designer and Creator | 2024

Designed and built a narrative-driven game in Unreal Engine, crafting the story, world, and interactive elements. Created an immersive, surreal environment where the player explores a young girl's nightmare, with the surroundings evolving to reflect her emotions. Focused on interactive storytelling, atmosphere, and player immersion, using sound design to enhance the emotional depth and overall experience.

#### Photography and Creative Direction | 2023

Created a photography project with Plymouth charities, capturing black-and-white, high-fashion inspired portraits of marginalised groups in urban settings. Designed an interactive exhibition with encouraging audience participation through written responses, transforming the images into protest style statements on empowerment and visibility. Additionally, co-led the creative direction and curation of our second year university exhibition, overseeing how the entire class's work was displayed and experienced.
